Waterfront Studios  
19 Neptune Quay,  
Ipswich,  
IP4 1QJ

Dear Waterfront Studios Team,

I am eager to apply for the Junior Programmer role at Waterfront Studios, attracted by the opportunity to engage with innovative game development. With a robust background in C# and Unity, complemented by successful problem-solving in game engine and feature development, I am well-prepared to contribute to your dynamic team.

In my academic projects, I have demonstrated acute problem-solving skills essential for game development. Notably, during a game engine project, I identified and rectified a critical error where an essential asset was inadvertently deleted, showcasing my capacity to troubleshoot and solve complex issues effectively. Similarly, resolving a critical bug in Sling! under tight deadlines exemplifies my proactive approach to problem resolution.

My education in Games Development at the University of Suffolk has equipped me with key programming competencies and an understanding of 3D mathematics. These skills, paired with my intrinsic motivation and enthusiasm for gaming, align well with the Junior Programmer position.

I am impressed by Waterfront Studios' commitment to growth and innovation, values that mirror my professional aspirations. I look forward to potentially discussing how my background, skills, and problem-solving capabilities can support the creative endeavors at Waterfront Studios.

Thank you for considering my application. I am keen to discuss my suitability for the Junior Programmer position further and explore how I can contribute to the success of your team.

Sincerely,

Richard Casey
